

## Paso 0: Creación de repositorio y subida de primer archivo

Accedemos a la página web de **GitHub** y seguimos los pasos para registrarte (crear usuario, correo ([ejosmel@gmail.com](mailto:ejosmel@gmail.com)) y password) y crear una cuenta. Usamos la opción "skip personaliza on".

The screenshot shows the GitHub homepage. On the left, under 'Create your first project', there is a green 'Create repository' button. On the right, under 'Home', there is a form to 'Start a new repository for ejosmel'. The form includes a text input for 'Repository name \*', radio buttons for 'Public' and 'Private' (with 'Private' selected), and a green 'Create a new repository' button. Below the form, there is a 'Top repositories' section with a search bar and a list of repositories, including 'ejosmel/ia2024'. A red arrow points from the 'Create a new repository' button in the form to the 'ejosmel/ia2024' repository in the list.

Parece que de lo primero que hay que hacer es dar un nombre al repositorio y crear un fichero con la intención (tipo Readme file)

## Quick setup — if you've done this kind of thing before

 Set up in Desktop

or

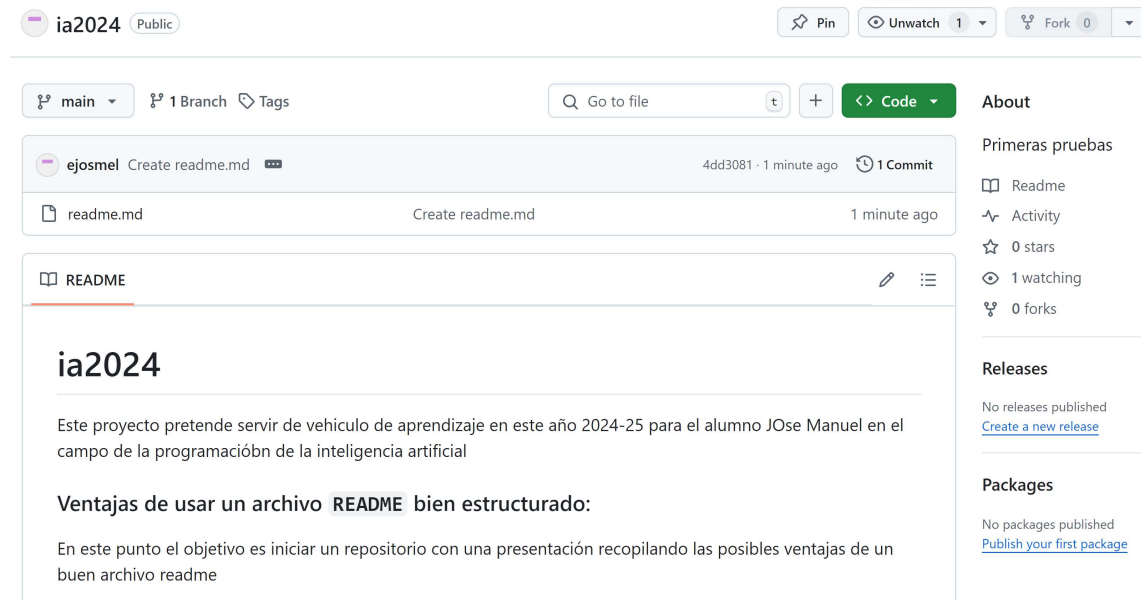

HTTPS

SSH

<https://github.com/ejosmel/ia2024.git>

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#)

Incluimos un archivo de presentación readme. md

The screenshot shows a GitHub repository page for 'ia2024' (Public). The repository has 1 branch (main) and 1 commit. The README file is displayed, showing the title 'ia2024' and the following text:

Este proyecto pretende servir de vehiculo de aprendizaje en este año 2024-25 para el alumno JOse Manuel en el campo de la programacióbn de la inteligencia artificial

**Ventajas de usar un archivo README bien estructurado:**

En este punto el objetivo es iniciar un repositorio con una presentación recopilando las posibles ventajas de un buen archivo readme

The right sidebar shows the repository's statistics: 0 stars, 1 watching, and 0 forks. It also includes sections for 'Releases' (No releases published) and 'Packages' (No packages published).
